We're a new agency — and we're honest about it. That means you get

founder-level attention on your account, not a junior assigned after the pitch. We're building our portfolio and we price accordingly.

// WHAT WE DO

OUR EXPERTISE

Core digital services — no fluff, no upsells you don't need.

SEO

Technical SEO, keyword strategy, on-page and off-page. We handle everything — from crawl errors to content clusters that rank.

Google Ads & PPC

Performance campaigns built to convert, not just click. Every euro in your budget is tracked and justified.

Social Media

Content strategy, organic growth and paid social across Instagram, Facebook and LinkedIn — tailored to your audience.

Web Development

Fast, conversion-optimised websites. Built with SEO baked in from day one — not bolted on after launch.

Email Marketing

Automated flows that nurture leads and close deals. Onboarding, re-engagement, upsell — all set up and managed.

// WHY DEVTEAM

THE HONEST DIFFERENCE

You get the founders, not interns

As a new agency, every client matters to us. You'll always work directly with the people who actually do the work — not an account manager reading from a report.

Startup pricing, senior thinking

We're building our portfolio so we price competitively — but our team holds real Google, Meta and HubSpot certifications. You're not paying for our office in a fancy building.

Transparent reporting, always

Monthly reports in plain language. Real numbers — traffic, leads, revenue.
No vanity metrics, no "impressions" to pad the slide deck.

Riga-based, Europe-ready

We understand the Baltic and European market. We work in Latvian, Russian and English — and we know the local search landscape better than remote agencies abroad.
